

MITIS, Lakshmangarh Students to do their M.Tech Projects in Germany

Four students of Mody Institute of Technology & Science left for Germany on September 26, 2011 for six months to do their project work in GSI Helmholtz Centre, Darmstadt. These students, Ms. Yashika Bansal, Ms. Nidhi Tiwari, Ms. Namrata Joshi and Ms. Neha Sharma are currently pursuing their M.Tech in VLSI Design in the Electronics & Communication Engineering Department of the Faculty of Engineering & Technology.

GSI Helmholtz Centre for Heavy Ion Research is known the world over for their advanced research in the field of heavy ion using cutting edge sensor technologies and these students will be working for their M.Tech project works using the most sophisticated equipment and software available there.

These students have been selected through rigorous procedures by GSI and they are being provided monthly scholarships as well as free accommodation and medical insurance charges by GSI. Mody Institute has provided 50% of their air travel and visa charges. One undergraduate student of the Faculty of Engineering & Technology, Ms. Ritika Nath, has already completed her training in the same institute in Germany and her work has been greatly appreciated there.

MITIS FET provides scholarship of Rs.8,000/- p.m. to all the selected M.Tech students and such trainings are very valuable for turning out researchers and teachers of high quality that are in acute shortage in India.
